

**PAC 502**

## End Milling Machine 2 Blades

It performs the common alignment process of PVC and aluminum profiles with high quality and precision.

It performs the notching process automatically.

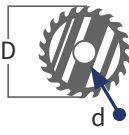

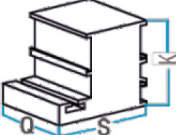

Two separate blade sets that move automatically can perform the notching processes of different profiles without making any adjustments and without losing time.

The profile is fixed vertically with pneumatic pistons.

Blade advancement speeds can be adjusted.

It is possible to process at different angles up to 45°.

**Technical Data**

TECHNICAL FEATURES								
					BAR	Air cons.		
PAC-502	1.1 kW 400V 50Hz	D=150mm (max) d=30 mm	3000 D/min. RPM	K=80mm(max) S=75mm(max) Q=.....	6-8 Bar	5 Lt/min	81x55x120 cm	105 kg
