

**TP 120**

Automatic End Milling Machine

End milling of the PVC and Aluminium transom profiles with high quality and precision

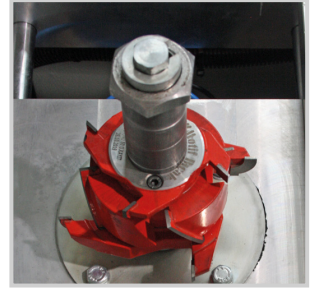

Automatic end milling process

Two different series of transom profiles can be processed automatically, no time loss, no need to change the settings nor the cutter set

Vertical and horizontal pneumatic profile clamping system

Adjustable saw blade feed speed

Easy working at different angles

**Technical Data**

TECHNICAL FEATURES								
					BAR	Air cons.		
TP-120	2.2 kW 380V 50Hz	D=180mm (max) d=30 mm	3000 D/min. RPM	K=120mm(max)	6-8 Bar	10 Lt/min	90x48x106 cm	120 kg

Optional Features

Cooling system for Aluminium profiles

Hydro-pneumatic system for Aluminium profiles

Standard Equipments

Cooling system
